

User Guide: Intercom System

Visitor entering

Upon arriving at the entrance gate of the estate; the visitor should push the call button on the intercom adjacent to the guardhouse. The phone in the guardhouse will be answered by the Guard on duty. The visitor should announce themselves and inform the guard as to which unit they are visiting on the estate.

The guard will then place the visitor on hold and call the requested unit on the intercom system. Once the resident confirms the visitor the guard will open the entrance gate allowing access to the visitor.

Visitor exiting

When leaving the visitor should drive up to the gate slowly. The gate will open once the vehicle is close enough to activate the loops in the ground.

Residents entering

Residents must use the remote system to gain entrance to and exit the estate.

General

Should the residents need to speak to the security guard from their unit they should push L2 (Line 2) and then dial **911** on the telephone keypad. This call will be directed to the security guardhouse.

This and additional information is also available on the estate communal website; **<http://elmwood.commun-e-state.com>**
